BRINGING ECONOMY AND ECOLOGY TO YOUR BUSINESS

FLEXIBILITY FOR YOUR TEAM

The FS-1128MFP is a highly reliable multifunctional product that has a large number of standard functionalities that make it a very efficient workgroup device. It can print and copy at a fast 28 pages per minute, whilst the standard duplex functionality for print and copy reduces your paper consumption and the need for office filing space. And if the trend in your office is away from hard copies, you will find the advanced scan functionalities of this device an ideal addition to your digital document workflow.

MAKING EVERY JOB AS EASY AS POSSIBLE

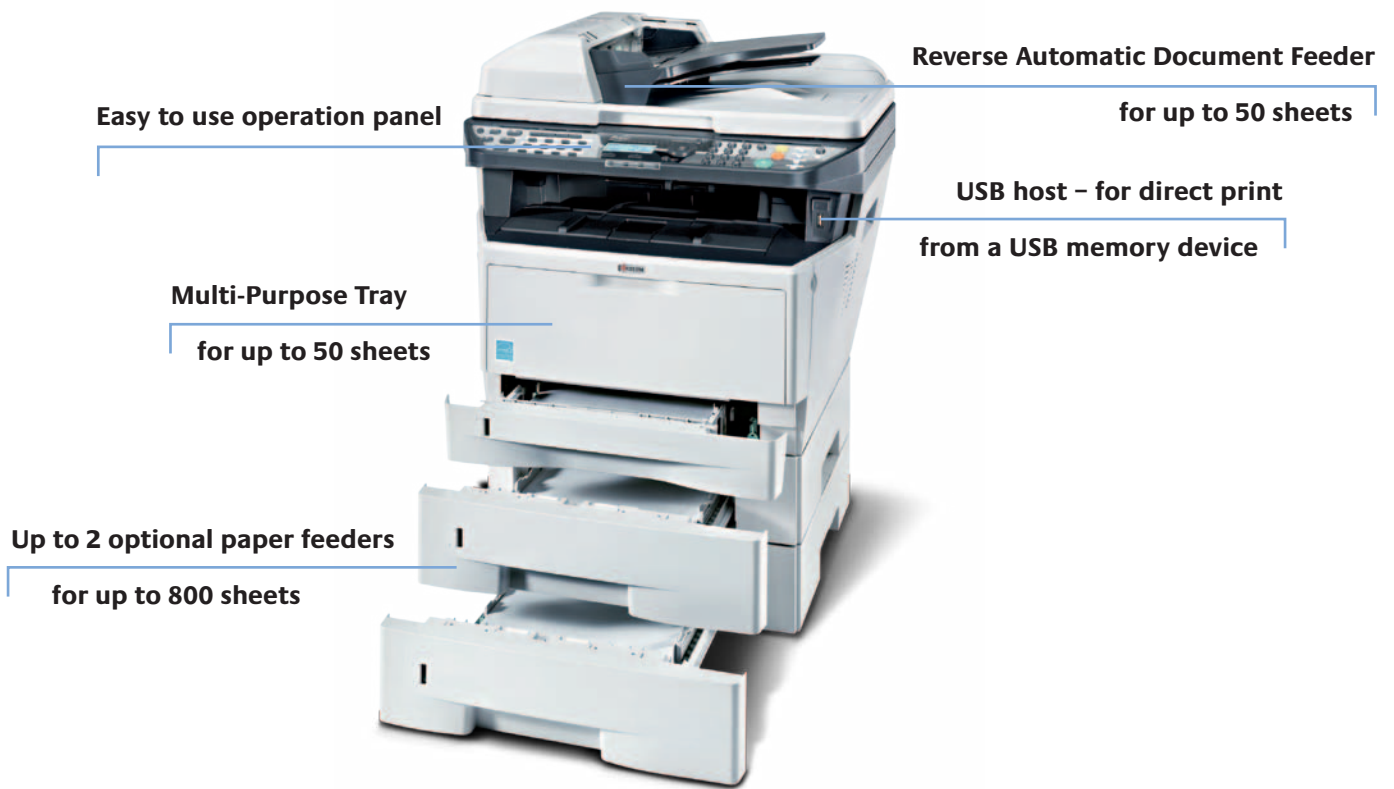

The FS-1128MFP ECOSYS device is designed for maximum operational efficiency. Easy to use, the new control panel has an intuitive layout for simple access to all of the different functions you use in a day. And with the USB interface conveniently positioned on the front of the device, printing can be carried out just as quickly from your USB stick as it can from your computer.

SMALL IN SIZE, BIG IN CAPABILITIES

Conveniently compact, this multifunctional device delivers the kind of advanced functionality normally associated with larger machines. Take, for example, the fast and efficient scanning functions. The FS-1128MFP provides you with full colour scans that can be saved as a PDF, JPG or TIFF file. And with the reverse automatic document feeder, you can scan both sides of a document automatically. All scans can then be sent to any PC or server in your network – or attached directly to an e-mail and sent right from the device.

DON'T LET ANYTHING SLOW YOU DOWN

The FS-1128MFP offers standard fax functionality that uses G3 technology. This means that in standard mode this multifunctional device can transmit a fax in only 3 seconds for a standard A4 sheet of paper, providing fast document transfer.

FULL RANGE DATA SECURITY

Easily integrated into modern network environments, this multifunctional device offers top-level security for everything you do on your network. Whether you send a print job through your network, copy or scan at the device or use the convenient fax function, the IPsec and the SSL suite of encryption protocols guarantee that the data travelling through your network cannot be decoded by a third party. LDAP network authentication delivers further security without the need to set ID access data for each single user. Simply use the preset network authentication data for managing the access rights to the machine functionalities.

FS-1128MFP

MONOCHROME MULTIFUNCTION FOR A4 FORMATS

The FS-1128MFP includes:

PRESCRIBE IIe

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (multipart forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

The KMnet Viewer

The KMnet Viewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunction units from any Windows® PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

Status Monitor and Command Center

The Status Monitor shows the current printers condition and gives direct access to the Command Center for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).

USB Host Interface for USB Flash Memory

PDF files can be printed directly from a USB Flash Memory (e.g. USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.

Our Unique Printing Technology

ECOSYS stands for ECOlogy,

ECONomy and SYStem-printing.

With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly, and the drum unit every 100,000 pages. The modular design concept allows you to add workflow enhancing functions as required. Integrated system software provides long-term cross-network compatibility. KYOCERA's long-life components cost you and the environment less.
